The following **optional** features are implemented:
* [T] Settings page to change the default tip percentage.
* [T] UI animations
* [ ] Remembering the bill amount across app restarts (if <10mins)
* [ ] Using locale-specific currency and currency thousands separators.
* [ ] Making sure the keyboard is always visible and the bill amount is always the first responder.
This way the user doesn't have to tap anywhere to use this app. Just launch the app and start typing.

The following **additional** features are implemented:

- [ ] List anything else that you can get done to improve the app functionality!

Video Walkthrough

Here's a walkthrough of implemented user stories:

GIF created with [LiceCap](http://www.cockos.com/licecap/).

Notes

Describe any challenges encountered while building the app.
a. It took me some time to figure out how to animate two subviews to adjust their positions and sizes while typing
